# EXPERIENCE

### PROSPER I.T. CONSULTING
APRIL – MAY 2020
Software Development Intern

I worked on a development team consistently of several people on a content management service for a local theater/acting company. During my time on the project I worked on several front-end and back-end tasks.

• Using HTML5 in compliance with the latest tags and CSS I created web application views that would be the face of the client's brand, specifically the homepage.
• Using Javascript and jQuery I created dynamic features to enhance the user experience by improving the user interface.
• With Entity framework and C# I created a strong foundation of models and controllers for the CMS to dynamically populate a database on Microsoft's Azure. Using C# I also designed a dynamically generated form to allow the user to query and filter data from the database.

### ARCHDIOCESE OF PORTLAND, OREGON
OCTOBER 2016 - PRESENT
Groundskeeper

Responsible for backhoe operation, funeral services, maintaining landscaping, irrigation repair, concrete pouring and finishing, and general grounds maintenance.

# EDUCATION

### THE TECH ACADEMY
JUNE 2020 – MAY 2020
An intensive boot camp-style training program with nearly 1000 hours of instruction with hands-on training in both front-end and back-end development. I was trained to develop full-stack applications using HTML, CSS, Javascript, jQuery, SQL, Python, C#, .NET framework, and Entity Framework.
